**Neel Raval**

**Role: UI-UX DESIGNER**

**UI-UX DESIGNER – ArtyUs**

## **1. Tools Used**

**“I used Visily AI for generating initial wireframes and concepts for all my UI screens of ArtyUs.”**

---

## **2. How I Used AI**

**“Instead of manually starting from a blank frame, I used Visily to create first-draft wireframes.**

**But the AI never produced the exact layout I needed, even after multiple attempts.**

**So AI was only used as a starting point — after which I manually redesigned each screen in Figma.”**

---

## **3. How Many Prompts I Used**

**“For each page, I used 4–6 prompts because a single prompt was never giving accurate results.**

**Every time I had to refine the prompt, add more context, fix the mistakes, and then manually adjust layouts.”**

**Overall, I used 50+ prompts across all 11 screens.**

---

#### **4. Time Spent (Updated With Frontend Work)**

<b>Task</b>	<b>Time</b>
<b>Prompt writing + AI attempts (multiple tries per page)</b>	<b>30–40 mins per page</b>
<b>Manual corrections in Figma after AI output</b>	<b>25–35 mins per page</b>
<b>Collaboration with frontend team member</b>	<b>2–3 hours</b>
<b>Total pages</b>	<b>11 screens</b>
<b>Total Estimated Time</b>	<b>8–10 hours + 2–3 hours (frontend)</b>
<b>Total Time: 10–13 hours of work</b>	

---

## 5. Collaboration With Frontend Team

**“In addition to UI/UX design, I sat with my frontend teammate during the development stage.**

**I explained spacing, layout structure, color usage, component alignment, and the user flow.”**

**I helped them convert wireframes into React components by:**

- Walking them through screen-by-screen design**
- Guiding spacing, typography, and theme consistency**
- Ensuring the final implementation matched the wireframe**
- Fixing mismatches between design and code**
- Coordinating page structure and reusable components**
- Reviewing frontend screens and suggesting UI corrections**

**This collaboration required an extra 2–3 hours of planning, feedback, and corrections.**

## **PAGE 1 – Landing Page (5 prompts)**

- 1. “Generate a wireframe for an art marketplace homepage with hero banner + categories + featured products.”**
  - 2. “Make the UI more minimal and modern; remove clutter.”**
  - 3. “Add search bar and product filters.”**
  - 4. “Center the hero image and highlight call-to-action.”**
  - 5. “Fix the layout alignment and spacing.”**
- 

## **PAGE 2 – Login Page (3 prompts)**

- 1. “Generate a login screen for buyers and artisans with email + password + forgot password.”**
- 2. “Make the layout cleaner with left image and right form.”**
- 3. “Add a toggle between Buyer and Artisan login.”**

## PAGE 3 – Register Page (4 prompts)

1. “Create a signup screen with basic user info fields.”
  2. “Add role selection (Buyer / Artisan).”
  3. “Add validation hints.”
  4. “Reduce extra decorations; keep simple.”
- 

## PAGE 4 – Categories Page (4 prompts)

1. “Create list of art categories in card layout.”
  2. “Add filters + search.”
  3. “Make cards more minimal.”
  4. “Add pagination section.”
- 

## PAGE 5 – Product Listing Page (6 prompts)

1. “Generate grid layout with product cards: image, name, price.”
  2. “Add sidebar filters (price, category, artisan).”
  3. “Make product cards uniform size.”
  4. “Fix spacing; add hover effect.”
  5. “Make it more modern / minimal.”
  6. “Reduce unnecessary icons.”
- 

## PAGE 6 – Product Details Page (5 prompts)

1. “Product image left, details right.”
  2. “Add artisan info section.”
  3. “Add reviews + ratings.”
  4. “Fix spacing and align all sections.”
  5. “Make Add to Cart more prominent.”
-

 **PAGE 7 – Cart Page (3 prompts)**

1. “Cart items list with quantity and pricing.”
  2. “Add discount code section.”
  3. “Add checkout button with summary.”
- 

 **PAGE 8 – Checkout Page (4 prompts)**

1. “Create checkout flow: shipping, order summary, payment.”
  2. “Add step indicator.”
  3. “Make payment methods clean and visible.”
  4. “Fix alignment.”
- 

 **PAGE 9 – Artisan Dashboard (7 prompts)**

1. “Dashboard with stats + recent orders.”
2. “Add sidebar with navigation.”

3. “Add product management table.”
  4. “Add earnings overview.”
  5. “Improve layout consistency.”
  6. “Make cards equal size.”
  7. “Remove irrelevant widgets.”
- 

📌 **PAGE 10 – Add Product Page (5 prompts)**

1. “Form with product name, price, category, description, images.”
  2. “Add preview option.”
  3. “Fix spacing.”
  4. “Make it responsive.”
  5. “Make UI minimal.”
- 

📌 **PAGE 11 – Admin Verification Panel (6 prompts)**

- 1. “List of artisans with verify/reject button.”**
- 2. “Add filtering options.”**
- 3. “Add search bar.”**
- 4. “Add status labels.”**
- 5. “Make table modern.”**
- 6. “Add admin sidebar navigation.”**
